1956 officers selected 564
nominating committee for AIME officers, 1957 1346

O

Ohio Valley Section has L. F. Reinartz as guest 66

P

Pacific Northwest Conference:
chairmen for 1955 meeting named 69
increasing attendance marks successful meeting 769
program 561
to be held in Seattle, 1956 1343
topics 492
Philadelphia Local Section:
hears A. B. Cummins 69
holds dinner meeting 652
sees taconite film 767
Pittsburgh extends new building offer 1137
Pittsburgh Local Section meets 272
progress report on engineering building 981
publications fund to be continued 564
publications policies for 1956 1346

R

Raymond Award procedure changed 272
Raymond Award receives bequest 1343
Reinartz, L. F., guest of Ohio Valley Local Section 66
Reinartz, L. F.: scholarship established 269
Reinartz NOHC scholarship awarded 981
research in progress, IMD fall meeting 846
research projects supported by AIME 66
Rocky Mountain Minerals Conference program 980
Rosi, F. D., Philadelphia Local Section speaker 652

S

Shearman, Robert W., new Metals Branch Secretary 843
Smart, Jr., J. S., addresses Connecticut Local Section 564
Smith, H. DeWitt, biography 270
Smith, W. V., joins staff 273
Southern Ohio Section meets 68
Spokane Section hears talk on uranium 652
Spokane Subsection hears Bruce Gonser 66
staff changes 1343
stature committee approved by board 563
student chapter formed 274
study proposed for headquarters 924

T

TPC names members 1343
Tatu, John, open hearth committee session, annual meeting 569
Trilli, L. J., mechanical working session, annual meeting 573
Turnbull, D., transformation session, annual meeting 571

V

Vogel, F. L., deformation session, annual meeting 571

W

West Virginia University forms second student chapter 274
Westerman, Edwin J., twins 69
Westerman, Richard E., twins 69

isothermal sections, Ti-rich corners, Ti-Cr-O, Ti-Fe-O, Ti-Ni-O systems 113
liquid Fe-Tl 55
liquid Pb-Sn, Sb-Cd, viscosity, density. Discussion 766, 1264
magnetic properties, Mn-Ge 359
martensite formation, Ti-Fe 64
metallography, Cu-Au 424
Mg-rich corner, Mg-Li-Al system 355
Discussion 1267
Mn modification, Fe-S-O system. Discussion 1255
mobilities in diffusion in α brass 88
molten Al-Si, solid Al in, solution rate 81
Ni, substructure, tensile properties. Discussion 694
ordering, magnetic heat treatment, 50 pct Fe-50 pct Co 985
ordering reaction, Cu_3Pd. Discussion 710
O solubility, oxide phases, Fe-Cr-O system 253
Discussion 1250
phase equilibria, system FeO-Fe_2O_3-SiO_2 965
properties of, influence of magnetic on 619
pyrophoric, microstructures of 315
quenching Tl 1241
recrystallization, Al-Mg 369
S activity, liquid Fe-Ni 908
sintered WC-Co 311
sintering stainless steel 305
solid state bonding, Al-Cu, Al-Zr 891
solubility of O in liquid Ni, Fe-Ni 477
strains, watt losses, grain-oriented Si-Fe 480
temper brittleness, Fe-Ni-Cr 412
texture loss, tapes, Ni-Fe 921
thermal conductivity, U 1192
thermal conductivity, V 1010
Ti-C, Ti-C-O, structure, properties 73
Ti-Cu, heat treatment, mechanical properties 117
Tl-Pb system 101
transformation kinetics, U-Cr 1221
transus diagram, microstructure, Ti-Al-Mn alloys 108
U-Cr system 1219
V-Zr system 345
Discussion 1266
Zr-Cb system 1034
α Brass: diffusion Zn, Cu in 1004
mobilities in diffusion 88
α Phase: see Phase diagrams, Phases.
Alumina: hydrated, NaOH solutions, solubility, density 1123
lime-alumina-silica slags. Discussion 1257
smelted, Al-Si alloy production 632
Aluminum: α phase, eutectoid Cu-Al 1228
cold rolled, single crystal, recrystallization textures 1249
creep-rupture, Al-Mg solid-solution alloys. Discussion 715
crystal structure, properties, Zr_2Al 394
effect on hardenability Tl alloys 1245
equilibrium relationships, 38 Al alloy 145
Discussion 697
experimental production, Al-Si alloys 630
lineage structure, single crystals 1041
Mg-rich corner, Mg-Li-Al system 355
Discussion 1267
p-n junction, Al zone through Si slab 963
recrystallization, Al-Mg 369
recrystallization textures, cold rolled 382
Discussion 1270
Se vapor-deposited on 379
solid, in molten Al-Si alloy, solution rate 81
solid state bonding, Al-Cu, Al-Zr 891
superpurity, recovery, recrystallization 1053
values of magnetic transformation for 625
Amine, fractional replication illustrated 835
Ammonia: dissociated, sintering stainless steel 304
pressure process, leaching Ni, Cu, Co from sulphide concentrates 457
Ammonium perrhenate, spectrochemical analysis 168
Amsler-Morton pits used, The Steel Co. of Canada Ltd. 1109
Anatomy of the Open Hearth 545
Ancker, B. and Parker, E. R.: *Quantitative Substructure and Tensile-Property Investigations of Nickel Alloys.* Discussion 694
Andrew, K. F. and Gulbransen, E. A.: *Solubility and Decomposition Pressures of Hydrogen in Alpha-Zirconium* 136
Andrew, K. F. et al.: *Electron Optical Study of Oxidation of High Purity Iron at Low Oxygen Pressures.* Discussion 701
An Evaluation of Dissociated Ammonia and Hydrogen Atmospheres for Sintering Stainless Steel 304
An Examination of the Decrease of Surface-Activity Method of Measuring Self-Diffusion Coefficients in Wüstite and Cobaltous Oxide. Discussion 700
Annealing: Cu grain structure 1044
effect, irradiation effect similar to, stainless steel 555
effect on hardness, grain size, Re 177
effect, Zn crystals 209
Discussion 1273
electrolytic Fe with wet, dry H 489
fatigued Cu, no energy released 99
maximum strength Ti alloys by 73
orientations, β-annealed Zr 395
Discussion 1271
superpurity Al 1053
superpurity Al-Mg alloys 369
temperature, effect of strengthening, Zn crystals 678
Discussion 1262
texture, α brass 385
Discussion 1267
textures, Cr 1044
time, influence on residual induction, Fe-Co 936
Anolyte, leaching reduced Mn ore 51
Antimony: Ga-Sb system 351
liquid Sb-Cd, viscosity, density. Discussion 760, 1264
Aqueous pulp, U ore, treated with air or O 463
Arc casting (see also Fabrication): Cr 1064
wrought Mo, properties 287
Arc furnaces (see also Electric furnaces, Furnaces): consumable-electrode, melting high purity Fe 467
